VECTORUX TECHNOLABS • Thalassery
06/2023 - 09/2023

- Developed RESTful API, Fast API and GraphQL.
- Built database using PostgreSQL.
- Deployment on a dedicated server.
- Learnt the cloud deployment.

Skills

Python, Django, Flask, Panda, Numpy, MySQL, PostgreSQL, REST API, FAST API, GraphQL, Cloud Hosting, AWS, Azure, GitHub, JWT, Celery, HTML, CSS, JavaScript, Java, C-Programming, OOP, DevOps Principles

Projects

- ([Click here](#)) **ShareInfo For Aspirants** - LinkedIn replacing placement portal in Campus. As this is a company project, Codes can't be disclosed. This project is hosted in Azure with PostgreSOL database of Azure itself. Used Celery for Background processing of mails and notification.
- **Country Mates** - Developed a travel experience-sharing platform featuring Instagram-style posts with images and videos, event updates for ongoing and past events, and curated tour packages for customers, enhancing user engagement and travel planning.
- **Spa Booking** - Enabling users to browse services, check availability, and book appointments seamlessly, enhancing customer convenience and streamlining spa operations.
- **Blood Donation Management** - To manage the list of students who are eligible for donating Blood. The front end is built on Flutter for mobile app and the backend is built on DRF. Hosted in AWS(Ubuntu server) with Custom Domain.
- **Hospital Management System** - This project is not alive. Built on DRF. Not hosted in any platform. Group wise permission of APIs are integrated
- **Central Event Management System(CEMS)** - An app for hosting events in Campus, participating in the Events and managing the Events.
